

## Features

**12 mm heavy floor:**  
Has the thickest substrate layer for wood flooring, making it the most durable.

**AC5:**  
Highest abrasion class (AC) rating based on tests for durability, impact resistance, swelling, stain resistance and fade resistance.

**Certification 33:**  
Highest abrasion class rating based on durability.

**25 years Warranty:**  
On residential use.

**10 years Warranty:**  
On commercial use.

**V3:**  
The depth of groove between the planks.

## Plank Dimensions

## Box Specifications

Planks per Box	8
Meter <sup>2</sup> per Box	1.6724
Square Feet per Box	18
Average Box Weight	15 lbs.
Box Dimensions	1,230 × 182 × 103 mm

## Pallet Specifications

Boxes per Pallet	50
Meter <sup>2</sup> per Pallet	83.62
Square Feet per Pallet	900
Average Pallet Dimensions	1,230 × 910 × 1133 mm
Boxes per Pallet Width/Height	5 Widthwise, 10 Heightwise

## Accessories

## Benefits

timberCore™ floor surfaces are 100% water-resistant.

timberCore™ floors are non-fading and retain shine over many years.

timberCore™ floor surfaces are flame resistant.

timberCore™ floors are rugged and highly resistant against load and impact.

timberCore™ floor surfaces are abrasion resistant.

timberCore™ floor surfaces are stain resistant.

timberCore™ floor surfaces are antistatic.

timberCore™ floor surfaces are Micro-Scratch resistant.

timberCore™ floors are produced natural/sustainable raw materials with 75% less formaldehyde.

timberCore™ floor surfaces are anti-slip.

timberCore™ floor surfaces are largely resistant against cigarette burns.

timberCore™ floors are well suited for sub-floor heating systems.

timberCore™ floors offer an efficient air exchange.

timberCore™ floors give a warm & comfortable underfoot feel.

timberCore™ floors are built with walking noise reduction.

# timberCORE™

## A new & revolutionary wood flooring system that is 100% water-resistant

Designed, engineered and manufactured to perfection, timberCore™ has one mission; to let life live. With today's challenges of laminate flooring and luxury vinyl tiles, here's the timberCore™ solution.

### solidGround™

Aluminum Oxide Wear-Resistant Top Seal

## The solidGround™ Commitment

Exclusive to Lucida® Surfaces, our solid ground stamp of excellence assures that we meet the following criteria:

- Generations of durability
- Rigidity and flawless stability (even over imperfect surfaces)
- Easy and simple do it yourself installation

timberCore™ planks are UL-rated AC5. This premium quality is typically reserved for the highest traffic commercial spaces.

Designed for ultimate durability, our planks are ready for anything. Extremely resistant to damages of any kind, up to ten times more than leading brands, this means the timberCore™ durability is measured in generations, not decades.

Laser-Printed Wood-Look Design Layer

Premium Pressed Poplar Wood Board

Balance Paper Layer

## Welcome health into every home

The timberCore™ difference is also in health and environmental responsibility. The core board is made of particleboard using real wood as opposed to MDF or HDF. This eliminates the level of formaldehyde by 75% making timberCore™ the only brand with this health advantage.

### nuClick™

Patented nuClick™ Interlocking System

## Out with old, in with the nuClick™

Our innovative nuClick™ locking mechanism offers ten times the lock-in strength of other brands. nuClick™ tabs are found on all 4 sides of each plank allowing for a much simpler installation that's 25% faster.

As the only floor system in the market that allows you to install, remove and re-install many times over without ever damaging the locking tabs, timberCore™ planks are always safe and remain intact with no wear and tear damage for smooth re-installation.

While offering an industry high locking mechanism, nuClick™ technology allows ample air circulation between planks to avoid buildup of mold and mildew and, in the event of using a heated floor, nuClick™ also allows heat to rise more efficiently.

### mBrace™

Patented mBrace™ 100% Water-resistant Casing

## Time to mBrace™ positive change

Lucida's mBrace™ technology features a 100% water resistant casing that fully protects planks from water damages such as warping, swelling and deformation. mBrace™ casing literally embraces the planks holding them dimensionally stable not to contract or expand. timberCore™ planks are always safe from any damages and are always reusable. In the event of a flood, simply unlock the planks, allow the floor and planks to dry, then re-install using the very same planks.
